

**REMARKS**

Applicant thanks the Examiner for the telephone interview on 12/13/05 and accepts the Examiner's Amendment.

For convenience in the following discussion, the individual paragraph amendments in the Amendments to the Specification section have been numbered. In response to the Notice of Drawing Inconsistency with Specification mailed on 2/28/2006, which for convenience is enclosed with this paper, Applicant submits the above amendments to the specification. The error leading to the inconsistency is with the reference numbers in the Brief Description of Drawings and not with the drawings. Hence, Applicant submits that the amendment to the Brief Description of Drawings is sufficient to remedy the inconsistency (Specifically, the amendments 4 & 5), without the need to amend the drawings.

Amendment 4, in addition to correcting grammatical errors, is responsive to the Notice mailed on 2/28/2006. The figure reference is amended to be consistent with the drawings. This correction is supported at least by the "Description of invention" section at lines 1-3 of page 19. Also, please note that a period is added to the end of the paragraph. No new matter has been added.

Amendment 5, in addition to correcting grammatical errors, is responsive to the Notice mailed on 2/28/2006. The figure reference is amended to be consistent with the drawings. This correction is supported at least by the "Description of invention" section at lines 5-7 of page 19. Also, please note that a period is added to the end of the paragraph. No new matter has been added.

Additionally, Applicant submits additional amendments 1,2,3,6,7,8,9 and 10 to correct minor clerical and grammatical errors. Again, no new matter has been added. For convenience in identifying some minor corrections, Applicant points out that in particular,

amendment 2 merely inserts a missing period at the end of the amended paragraph;

amendment 6 merely inserts the word "of" into the first line of the amended paragraph;

amendment 8 merely inserts a missing comma into the fourth line of the amended paragraph after the word "respectively" and changes a comma to a period after the word "connection" in the eleventh line of the amended paragraph; and

amendment 10 merely inserts the word "this" into the first line of the amended paragraph.

Conclusion

Applicant submits that the above amendments correct the inconsistency between the drawings and the specification. Should the amendment be insufficient to cure the inconsistency, please contact Applicant, Haw-minn Lu at (858) 689-2011 at your earliest convenience.

Respectfully submitted,

Haw-minn Lu
